

City Limits

A resource flow and ecological footprint analysis of Greater London.

Objectives

A resource flow and Ecological Footprint assessment for Greater London.

A set of scenarios for Greater London to illustrate the environmental implications of a range of environmental conservation options and waste minimisation and management strategies.

Assessment of data inputs by quality and identification of areas where there is data deficiency.

Project Partners

The Greater London Authority (GLA)

The Chartered Institution of Wastes Management (CIWM)

The Institution of Civil Engineers (ICE)

Biffaward

Status

Completed September 2002. The results were handed to the GLA for use in developing and monitoring progress towards reducing the environmental impacts of London's waste. A pdf version of the report can be viewed/downloaded at www.citylimitslondon.com
